Education

University of Tennessee, Knoxville Expected Graduation – May 2027
Bachelor of Science in Computer Science *GPA: 3.79/4.00 - Dean's List*
Relevant Coursework: Data Structures and Algorithms, Introduction to Cybersecurity, Operating Systems, Introduction to Machine Learning, Linear Algebra, Probability and Random Variables, Discrete Structures

Relevant Experience

Product Management Intern (Research Support Services Team) June 2026 – Present
St. Jude Children's Research Hospital *Memphis, TN*
- Leading a cross-functional team of 14 interns in development of an AI-powered chatbot that routes IS department staff to the correct internal contacts, reducing friction in cross-team communication.
- Overseeing parallel workstreams across UI/UX mockups, GraphRAG architecture, and Microsoft Teams integration, coordinating delivery through agile sprint cycles.
- Coordinating implementation of a user guide for ARIA Guide, a platform delivering pediatric oncology clinical knowledge to healthcare providers in lower and middle income countries.
- Served as a point of contact between developers and stakeholders, translating communication to clear technical directions.
- Facilitated daily standups, sprint planning, backlog refinement, and retrospectives across multiple projects, maintaining team alignment.

Product Manager July 2026 - Present
Hack4Impact UTK *Knoxville, TN*
- Leading product development for a nonprofit client, defining requirements, managing stakeholder relationships, and coordinating a cross-functional team of student developers.

AI/HPC Undergraduate Research Assistant August 2025 – Present
University of Tennessee, Knoxville *Knoxville, TN*
- Designed and built a JupyterLab frontend for an AI chatbot deployed in a data engineering course.
- Analyzed system performance and documented architecture, communicating results to stakeholders through presentations.
- Delivered a functional research tool used by real end-users, translating HPC workflow complexity into an accessible interface.

Product Engineering Intern June 2025 – July 2025
Wiillow *Remote*
- Collaborated with product and UX teams to deliver features for an AI-powered chatbot for children, reaching over **80** users.
- Owned feature planning from requirement gathering to delivery; balanced user needs, technical feasibility, and timeline constraints.

Projects

Fitness Tracker (Full-Stack Product) | *React, TypeScript, FastAPI, PostgreSQL* Sep. 2025 – Dec. 2025
- Defined product roadmap and **4 core MVP features** (analytics dashboard, nutrition tracking, exercise tracking, goal tracking, and user settings) within a 3-month development cycle.
- Led team of **5** developers and assigned tasks based on skill sets to ensure on-time delivery during development sprints.

Quadrupedal Robot Reinforcement Learning | *Pybullet, PyTorch, Gym* Mar. 2025 – May 2025
- Defined evaluation metrics and success criteria for autonomous social interaction tasks.
- Drove iteration cycles based on testing data, improving reward performance by **164%** and reducing training time by **40%**.
- Presented findings to research faculty and documented key design decisions and results.

Leadership & Activities

Conference Director, Society of Asian Scientists and Engineers (SASE) May 2024 – Present
University of Tennessee, Knoxville *Knoxville, TN*
- Led end-to-end project planning for **15+** students to a national conference, defining scope, timeline, and budget.
- Managed stakeholder communication across students, faculty, and sponsors, securing a budget of over **$35,000**, and ensuring alignment with travel logistics, budget, and documentation.

Technical Skills

Product/Project: Agile/Scrum, Roadmapping, User Research, MVP Scope Definition, Requirements Documentation, A/B Testing, Stakeholder Management, Sprint Facilitation, Feature Prioritization
Tools: Azure DevOps, Jira, Trello, Git, Docker, VS Code, Microsoft Suite/365,
Technical: Python, C/C++, SQL (PostgreSQL), TypeScript, HTML/CSS, TailwindCSS, React, FastAPI, Linux
Libraries: Pandas, NumPy, PyTorch, PyBullet, Gym
